Support for the Request for Extension of Temporary Stay

I am submitting this comment in support of the SBE's request for a final 6-month extension to afford BAS licensees the opportunity to submit missing or erroneous information in the ULS database.

As a Chief Engineer for a small group of television stations I am responsible for approximately 45 BAS licenses of which only a handful have all of the correct information in the ULS database. I have been actively gathering the information and intend to submit FCC form 601's in the near future. I had been waiting for the Commission to rule on the SBE's request for a fee waiver for broadcasters submitting the forms before proceeding. I felt the waiver was reasonable in that all we are trying to do here is insure the completeness and accuracy of the one database that all groups will initially be relying on as we transition to the ULS PCN requirements.

Unfortunately the waiver request was denied on September 3. I'll accept that and move on; however, due to the lateness of the denial I do not believe I nor many of my counterparts nationally now have sufficient time to input all of the necessary Form 601's by the current deadline of October 16.

For this reason I fully support SBE's request for a final 6 month extension and urge the Commission to grant it.

Respectfully submitted,

Robert Wyatt
Manager of Engineering
